

sutton

AI, MECHATRONICS
AND FINANCE

SCIENTIFIC FOCUS

- Artificial intelligence
- Neural Networks
- Databases
- Finance
- Market Prediction
- Develop complex electronics systems

CONTACT INFORMATION

email: su.sutton.mail@gmail.com

PRINCIPAL PROJECTS

- Neural Network Bot Trading
- Creation of Solid Fuel Low Orbit Rocket
- AI Image Sorter

SKILLS

- I speak English
- I speak Spanish
- Tensorflow program in python
- and more...

ACADEMIC HISTORY

UNAM MEXICO CITY

High school

Several courses were held at the institution

CODE ACADEMY

Certificate

A Python and Artificial Intelligence development course was held

MECHATRONICS COURSE

Certificate

He went to a course in the development of complex electronics and python programming systems with raspberry pi

WHY I'M A GOOD ASSET TO OTHERS:

Specialization in Artificial Intelligence (AI) using Python and neural networks, with proven experience in the implementation and optimization of machine learning algorithms.

Deep knowledge and skills in linear algebra, providing a solid foundation for understanding and developing advanced AI algorithms.

Proven ability to work effectively in a team, collaborating with colleagues to achieve common goals, as well as effectively organizing to meet deadlines and deliverables.

Solid knowledge of blockchain and its application in various fields, which expands my ability to develop innovative and secure solutions.

Mindset oriented towards solving complex problems, both algorithmic and mathematical, using an analytical and creative approach.
